POWER SECTION

SWITCHES & LOADS

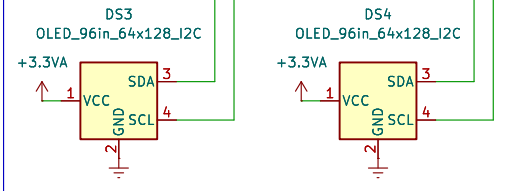

Current_Sensors

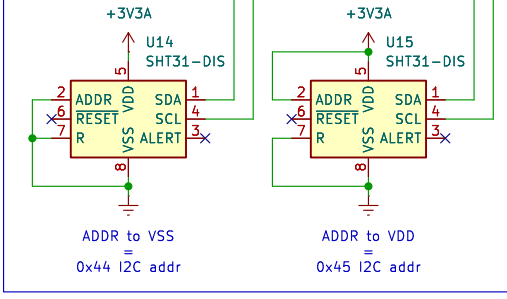

Microcontroller

No pull-up resistors included for I2C because the OLED and SHT31s are modules with built-in resistors. May need to alter modules or remove the resistors.

Pin assignment is not optimized
or based on any physical layout currently.

VOLTAGE BUFFER + FAN & LEDs

Question 4:
Datasheet says when OE is low, output is enabled. Is there any reason I shouldn't just use a pull-down to keep them enabled since the signal is controlled by the MCU?
